- Sept. 04 Chairman, Medical Records Committee  
Memorial Hermann Memorial City Hospital
- Sept. 04 Medical Executive Committee  
Memorial Hermann Memorial City Hospital
- March 05 Performance Improvement Committee  
Memorial Hermann Memorial City Hospital

Exxon Mobil Bloodborne Pathogen (BBP) Crisis Project:  
Emergently (12 hours) created and managed a comprehensive corporate medicine  
response to hundreds of XOM employees potentially exposed to BBPs through  
contaminated influenza vaccine injection cross-shared needles – through lectures,  
written materials, and project-specific website launch (all over a 48hr. period).

Then organized proper arms-length (from company) mass BBP lab screening and follow-  
up counseling on positive reports over the subsequent 3 months. As a result, employee  
panic was avoided and there were no lawsuits, to our knowledge, against the company  
for medical or personal-injury negligence. BBP positives were handled optimally  
without implication of the company (since there was no XOM causation established due  
to methodology set-up by Dr. Rensimer).
